

Add the following scores together from the Pest Assessment Guide and record each total.

	Scores	Total
Risk of becoming a pest	E + F + G + H	
Risk of establishing a wild population	B + C + D	
Risk to public safety	A	

Locate the level of risk for each category.

Level of risk	Low	Moderate	High	Extreme
Risk of becoming a pest	2 – 6	7 – 11	12 – 16	17 – 20
Risk of creating a wild population	2 – 5	6 – 9	10 – 13	14 – 17
Risk to public safety	0 – 2	3 – 5	6 – 8	9 – 10

Locate the level of risk for each category and record the threat status.

Risk of becoming a pest	Risk of a wild population	Risk to public safety	Threat status
Extreme	Extreme	Extreme, High, Moderate, Low	Extreme
High	Extreme	Extreme, High, Moderate, Low	Extreme
Moderate	Extreme	Extreme, High, Moderate, Low	Extreme
Low	Extreme	Extreme, High, Moderate, Low	Extreme
Extreme	High	Extreme, High, Moderate, Low	Extreme
High	High	Extreme, High, Moderate, Low	Extreme
Moderate	High	Extreme, High, Moderate, Low	Serious
Low	High	Extreme, High, Moderate, Low	Serious

Low	Low	Low	Low

Locate the level of risk for each category and record the threat status.

The risk of giraffe becoming a pest animal in Australia is _____

- Low** Care should be taken when bringing this animal into Australia.
- Moderate** Extreme care should be taken when bringing this animal into Australia. Rules should be in place to ensure this animal can not start a wild population if it escapes or is released from captivity.
- Serious** Do not bring this animal into Australia. If it escapes or is released from captivity it could start a wild population and cause damage to farms, the environment and people.
- Extreme** Do not bring this animal into Australia. It could start a wild population and cause great damage to farms, the environment, people and their property.
